

# Non-Toxic Plants

List Provided by the ASPCA Animal Poison Control Center

This list contains plants that have not been reported as having systemic effects on the animals, nor intense effects on the gastrointestinal tract. Any plant material ingested by an animal (as when dogs and cats ingest yard grass) may produce signs of vomiting, depression, or diarrhea. These signs are generally mild and self-limiting and often do not require any treatment.

The ASPCA Animal Poison Control Center, an operating division of the American Society for the Prevention of Cruelty to Animals (ASPCA), is the only animal-oriented poison control center in North America. It is a unique, emergency hotline providing 24-hour-a-day, 7-day-a-week telephone assistance. The Center's hotline veterinarians can quickly answer questions about toxic chemicals, dangerous plants, products or substances found in our everyday surroundings that can prove poisonous or fatal to animals.
