

Rehabilitation Therapy

At Hawthorne Animal Hospital we take exceptional care of pets. In continuing our mission to provide state of the art health care, we are offering services in rehabilitation for many different conditions such as post-surgery, arthritis and post-injury.

What is rehabilitation?

It is the treatment of an injury or an illness with the goal to decrease pain and recover function. Each rehab plan will integrate in-clinic treatment along with at home care.

Who needs rehabilitation?

Any pet that is recovering from a prolonged illness. Pets with arthritis, and pets needing weight loss: all benefit from rehabilitation programs. Also, any pet that as undergone surgery or sustained injury such as:

- Cruciate ligament injuries
- Hip injuries
- Invertebral disk disease
- Patellar luxation repair
- Osteoarthritis
- Senior Pet Exercise and Strengthening Plans
- Hunting and Agility Dog Conditioning

What does rehabilitation do for your pet?

Rehabilitation can be used to:

- Improve recovery time from surgery
- Increase flexibility, strength and endurance
- Improve balance and coordination
- Decrease inflammation
- Reduce chance of re-injury

Most importantly we can help reduce pain and increase quality of life with a program designed for your pet.
