

Laser Therapy Treatments

Laser Therapy is...
 A drug-free, non-invasive treatment for reducing pain and swelling in pets.

Otitis Before and After 5 Days
 Before & After 5 Days w/ Topical Meds & Treatment

Laser therapy uses a beam of light to deeply penetrate tissue without damaging it. Laser energy induces a biological response in the cells called “photo-bio-modulation” which leads to:

- Reduced swelling, pain and discomfort
- Faster healing
- Increased mobility and motion in joints

Laser therapy can be used for.....
